Lab AI Showdown: team answer cards

Print one set per team. For 7 teams, print pages 2 to 5 seven times (28 sheets).

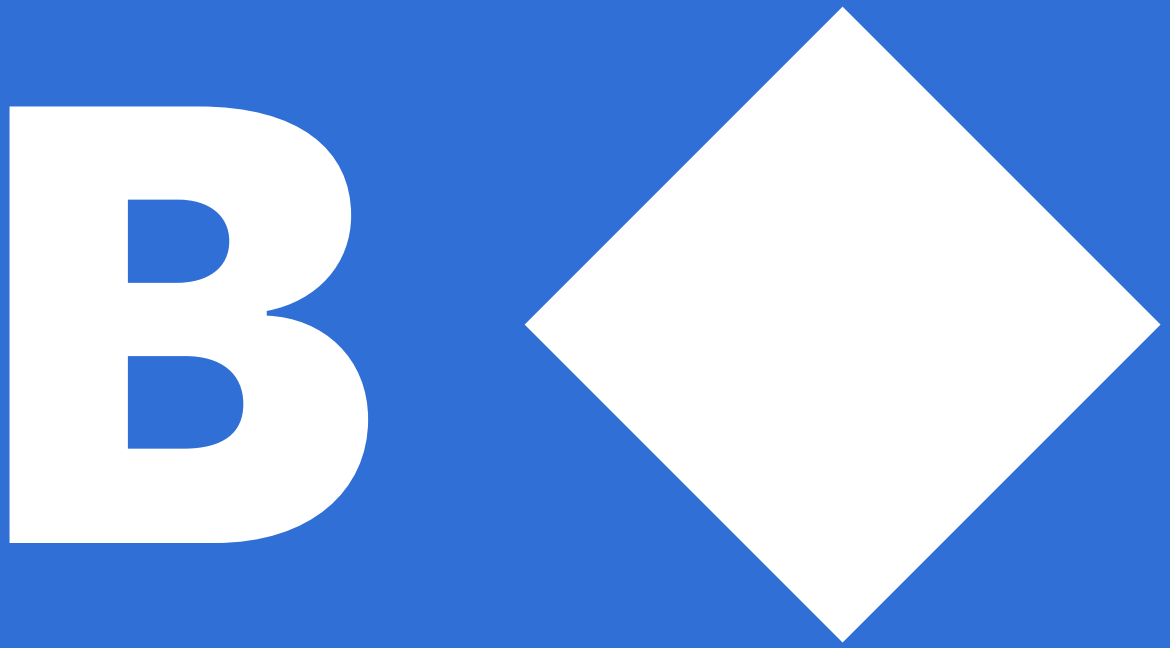

- Each set is 4 cards: **A** red triangle, **B** blue diamond, **C** yellow circle, **D** green square.
- Print in color if you can. The large letter and shape still work in black and white.
- Card stock or folding each sheet in half makes the cards easier to hold up.
- **No printer?** Teams hold up 1 to 4 fingers for A to D.

Some questions have only 2 or 3 answers. Teams keep the other cards down.

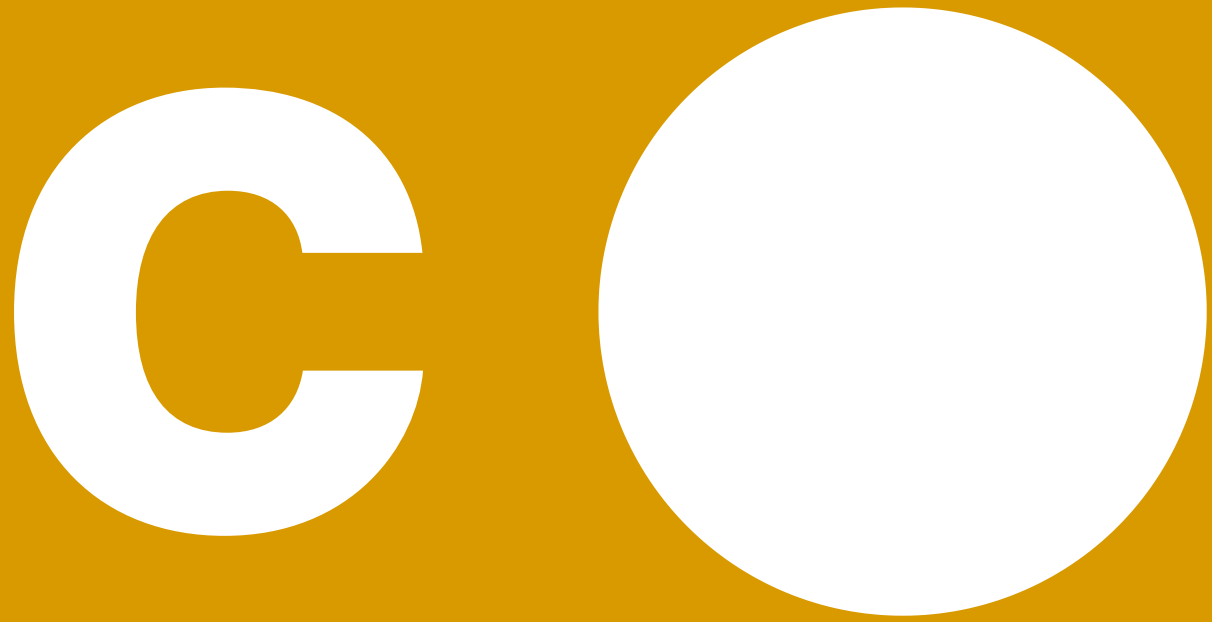

A
